

DISCOVER THE ALL NEW BIO MUSIC ONE USB DRIVES

The 6 Albums

Bio Music One albums are currently available on 3 different media. One of these is the USB Drive. The others are the CD and the audio download.

The on-board audio files are stored in both .wav and high quality .mp3 formats to ensure that as many devices as possible can read them – from computers, tablets and smartphones (via adapter) to HIFIs, car systems etc.

An integrated audio player is provided for playback in a computer browser. On other devices playback will start automatically with the device player.

Instruction manuals and other informative documentation to complement your Bio Music One USB drive can be found on the Bio Music One website.

Monte Cristo 1

USB Drives can be carried, in a pocket or nearby at a maximum distance of approximately 3ft. The user can then benefit from the vital support of the general waveform of the audio content, by informational resonance. This can be particularly useful when travelling, to protect yourself from environmental disturbances, such as those caused by artificial electromagnetic waves (cell phones, WIFI, relay antennas and other EMF sources).

Monte Cristo 2

A lanyard comes with each USB Drive to make it easy to carry by wearing around the neck. However, you can also keep it in a pocket, or a bag close by. Keep in mind that their active radius is approx. 1 metre. As always with Bio Music One, make your choice a conscious one.

Monte Cristo 3

The USB Drives can also be used by Feng-Shui and environmental harmony professionals: strategic positioning in a home or office environment can help to maintain a good ambient vibratory quality.

Audio playback nevertheless permits greater flexibility of use for personal development in a state of optimised conscious awareness.

Arnica Montana 2

What to choose: Should you go with the **all-in-one** 6-album USB drive or the 6 separate ones? With the all-in-one USB drive you can easily play all 6 albums continuously in the recommended order, thanks to an all-in-one integrated player you can use in your browser, providing optimal benefits. The advantage with having **separate** drives is that you can have them on or near you individually.

Arnica Montana 1

Warning! Copying files to another medium or device or modifying the original audio files in any way destroys the beneficial effects of the Bio Music One process.
